

Our physical and emotional Health in Winter in Chinese Medicine

Hello on week 202 we are sharing the connection of winter

and our health, thank you once again for all your support, we wish you Health, happiness, and peace. Thousand of years ago people lived in harmony with nature, they rose with the sun up and went to sleep with sun down, consume what they grew in each season and they lived aware of their environment some how they knew that these connection to nature has a direct impact on our wellbeing and all the aspects of our lives Since we are entering Winter lets talk about the connection to are overall wellbeing and this season. People often ask us why do we have the word beauty in the title of our blog, well for one is Isabel's beauty she likes to share information to keep your ideal beauty healthy and happy, with that being said, if we don't feel good or our state of mind in not a pleasant one we can't possibly look at our selves and see or feel beauty, our perception is compromised, so we believe that our wellbeing is at most importance to accomplish this.

According to Straight Bamboo by Alex Tan

<http://straightbamboo.com/how-to-stay-healthy-in-winter/>

Element: Water

Complementary Organ: Bladder

Complementary orifice: Ear

Season Winter

Color: Black

Nature: Yin

Primary function: Regulating the agin process

Skin Concern: Premature aging, hair loss, bone health and health of teeth

Organs: Kidney, Urinary Bladder, Adrenal Glands, Ears, and Hair

Taste: Salty

Emotion: Fear and Depression

Primary Evil: Cold

Active Time : 3pm to 7pm

Being that the ancient Chinese develop a system of medicine thousands of years ago and still is fully used today should tell us something, right?

A great part of this system is part of a greater concept derived from the ancient Chinese way of living their lives. The concept is to live in harmony with all a Chinese Doctor assesses not only the physical body, but also include energy, food, emotions and your full being, They also take in consideration the season of the year as part of the full diagnosis. They teach you how to live in balance so we can stay healthy and in full harmony with all.

A great part of the Chinese Medicine teaches to live in harmony with the seasons due to the fact that each season has associations the we need to adapt to so we can be in balance with the environment, especially if you consider that the seasons rule our bodies and our state of mind wellbeing.

Thousand of years ago people lived in harmony with nature, they rose with the sun and went to sleep at sun down, consume what they grew in each season and they lived aware of their environment. Some how they knew that it has a direct impact on our wellbeing and all aspects of our lives.

Since we are entering Winter, let's talk about the connection to our overall wellbeing and this season.

Winter in Chinese medicine represents the most Yin aspect of the TCM, due to Yin aspect being associated with dark, cold, slow, inward energy, contracting energy.

Winter is the season of retreat and rest, when the *Yin* (night, female, cold) is now dominant and *Yang* (day, male, hot) energy moves inward. Winter is a time of stillness and quiet, amplifying any sound there is around us. It is the time where this energy can be most easily depleted. Our bodies are instinctively expressing the fundamental principles of winter – rest, reflection, conservation, and storage. The ability to listen clearly to our bodies and the relation to everything around us at this time of year is sharpest, not only listening through conversation, but listening to your own body and understanding its needs, as well as having a deeper understanding of yourself and your interactions with others.

In winter, living things slow down to save energy while some animals hibernate. It is also the season where humans conserve energy and build strength as a prelude to spring. In Traditional Chinese Medicine (TCM), human health has long been considered to be closely tied to nature. The natural world is thought of as a holistic entity in itself, and man's health is determined both by his inner balance as well as in relation to the surrounding environment. Since ancient times, Chinese medicine practitioners have studied and developed in-depth parallels between nature and health.

TCM believes our diet should be adapted to focus on enriching yin and subduing yang, which means we should consume appropriate fats and high protein foods. Chinese yam, sesame, glutinous rice, dates, longan, black fungus, (mushrooms) bamboo shoot, mushrooms, leek and nuts are common ingredients in the Chinese dishes this time.

It is advisable to eat more food with bitter flavors while reducing salty flavors so as to promote a healthy heart and reduce the workload of the kidney.

Since a person's appetite tends to increase in winter when they have a lower metabolic rate, absorbed nutrients from foods can be stored more easily. Energizing herbs such as **ginseng**, wolfberry, angelica, rhemannia root, **astragalus** and **medicinal mushrooms** can be used for this purpose. The principle of harmony between food and the weather is based on practical experience. It may seem to contradict principles stated elsewhere but the fact remains: foods eaten during the four seasons have different impacts on the human body, doesn't that make sense? What we eat is directly connected in our wellbeing Ummm! An alien concept for most people. Foods become part of the body after being consumed but the four seasons (that is **environmental factors**) always have impacts externally and internally on the body. Chinese dietary philosophy suggests that you embrace your native foods in addition to eating locally-grown foods and those in season staying away from foods that don't grow in the vicinity and out of season foods. I grew up like this and we follow the belief that anything that grew away from us or out of season wasn't healthy to eat, no synergy.

FOUR SIGMA FOODS MEDICINAL MUSHROOMS

NAME:
REISHI

FOR:
CALM BODY & MIND,
RELAX AND DEEPER SLEEP.

DOSAGE:
*500MG OF POWDERED
EXTRACT/ DAY

Reishi mushroom is generally known as "the queen of mushrooms" due to its body-and-mind balancing properties. This ancient mushroom drink calms you down and ensures better sleep by naturally regulating the hormonal system and lowering cortisol levels.

NAME:
CHAGA

FOR:
BULLETPROOF
IMMUNITY

DOSAGE:
*500MG OF POWDERED
EXTRACT/ DAY

This "black gold" that grows on birch trees has been the most sought-after mushroom in Northern cultures for ages. Chaga mushroom is one of the highest sources of antioxidants in the nature and it helps you keep a bulletproof immunity to stay healthy.

NAME:
CORDYCEPS

FOR:
ENERGYBOOST AND
RECOVERY

DOSAGE:
*500MG OF POWDERED
EXTRACT/ DAY

Cordyceps mushroom is an adaptogen, not a stimulant, so it helps you maintain constant energy levels. It does this by activating the body's own energy production in the cells. Whether working out or looking for a balanced afternoon pick-me-up, cordyceps is the nature's miracle booster!

NAME:
LION'S MANE

FOR:
BRAIN POWER,
BOOSTER

DOSAGE:
*500MG OF POWDERED
EXTRACT/ DAY

Lion's Mane mushroom is an all-natural brain booster, a nootropic, with no side effects. It has been shown to improve memory, boost creativity and help with concentration by activating the nervous system and brain.

NAME:
SHIITAKE

FOR:
NURTURES SKIN & BEAUTY,
SUPPORTS THE LIVER

DOSAGE:
*500MG OF POWDERED
EXTRACT/ DAY

Shiitake mushroom (*Lentinula edodes*) is a true beauty food. In traditional Chinese medicine (TCM), Shiitake is used to heal the skin, support the liver, enliven the blood, and boost qi, the life force.

NAME:
MAITAKE

FOR:
WEIGHTLOSS AND
DIGESTION

DOSAGE:
*500MG OF POWDERED
EXTRACT/ DAY

Maitake mushroom (*Grifola frondosa*) can be of great help for diabetics and in supporting weight loss. It is especially known for its abilities to modulate glucose levels and to increase insulin production.

Lets keep in mind if we compare this list of food with other sources, you may find small discrepancies due to the differing opinion as to whether some foods belong in the Yin or Yan category.

For Winter the food color is Black, like black sesame seeds and other foods that we will mention here.

Pine nuts, anchovies, mussels, trout, walnuts and chestnuts are also warming. You can encourage circulation and transformation with warming herbs such as ginger, cinnamon, cloves, black sesame seeds, cardamom, fennel, anise, black pepper, ginger, walnuts, turtle beans, micro-algae (such as chlorella, spirulina) and dark leafy greens, black lentils, onions, leeks, shallots, chives, chicken, lamb, trout and salmon., black olives, black tea (decaffeinated) this time of year the Kidneys get compromised so caffeine is not so good for them. Cabbage, carrots, red beans, potatoes, cereals, soy sauce low sodium, black vinegar, black trumpet mushrooms, nori seaweed, lots of it, figs, dates, caviar, sesame oil, olive oil, clove tea, spearmint tea, to mention a few.

It is advised a small amount of unrefined sea salt added to your home-cooked foods, is also helpful since the taste associated with the Kidney organ is "salty." Please keep in mind not to over salt, though (as usually is the case in Western cuisine)

Foods in winter that build *yin* include beef, barley, turtle beans, millet, beetroot, wheat germ, seaweed, black sesame seeds, molasses, spinach, sweet potato and potatoes. Congees, stews and soups, bone-soups (stock) in particular the reason is that Kidneys are the ones that support the bones, and bone broth supports bone, naturally support *yin*.

So the idea is of calming foods like stews, and baby food like meals, warming!.

Avoid raw foods as much as possible; not to mention cold drinks and foods like ice cream. In general it is not the time for RAW foods.

Winter is a time of gentle quite celebration where nutritious and warming foods and family connection is promoted in home gatherings. Hence, many cultures have their biggest family/food festival of the year in this season – cozy

gatherings promoting interaction with friends and family with plenty of warming, comforting foods and moderate amounts of warming liqueur drinks, one glass of good organic quality wine helps the circulation of *yang* within the body and helps drive out the cold energy, how about that, yumm.

On stormy or windy days, stay indoors when possible and make sure to wear hats and cover the ears which represent your kidney and when they get cold the kidneys get affected. The body's *qi* needs to be conserved by keeping warm but not hot. Take care not to sit too close to the fire or by avoiding sweating when taking hot showers, baths or saunas as the pores of the skin open and *yang qi* is easily lost, so it is like leaving tiny little windows open and your heat escapes defeating the purpose. Keeping life simple and avoiding excessive lifestyles is preferable this time a year.

According

to: <http://agelessherbs.com/food-therapy/>

I thought water was good for me! people say

It is true that you want to stay hydrated; we need to consider the fact that beyond this, forcing liquids just so you can say that you had your '8 glasses of water' each day may only be putting an extra burden on the [Kidneys according to TCM](#). Additionally, [chronic dryness and thirst are likely an indication of Yin Deficiency](#) where your cells are not properly absorbing the water that you are consuming!!!. Imagine that your cells are dry peat moss; you add water to the peat moss, but it just rolls off so no absorption. If you have become [Yin Deficient](#), [Yin tonic herbs](#) and foods are utilized to improve

the cells permeability so that the water you consume can actually be used by the cells.

I thought drinking iced water helps will help me lose weight!

A really great way to see all of the blood drain out of your acupuncturists face would be to announce that you are drinking large amounts of iced water because you read that it would crank up your metabolism and help you lose weight Ayyy so the opposite. This latest misguided logic combines the ability to [damage the Spleen](#) AND compromise the [Kidney energetic systems](#) according to [Chinese medicine](#); the result would be weight gain and more serious imbalances that could take years to repair, I know these facts since very young, where I come from they never serve water or drinks with ice, it makes sense the body temperature is 98.6 degrees so when cold drinks at 30 degrees or below 98.6 are ingested the heart struggles to warm up and reach the 98.6 degrees and abandons the metabolism to a more important life threatening signal, how about that.

In Traditional Chinese Medicine (TCM) the stomach holds the food, while the spleen transports and transforms the food. Their ability to work properly is considered so important that the *qi*, or energy, of the human body rests on the proper function of the spleen and stomach. So cold foods and cold drinks fully tax this process.

Keeping the feet warm through winter is essential in order to nourish Kidney Chi. Less showers, especially too hot for the skin this time a year gets dry and hot water dehydrates it, you can treat your selves to more hot-water foot baths, and are recommended before going to bed. If you need a hot water bottle, or hot Flax seed bags, they are best be put down by the feet. In Chinese medicine we believe the head should be relatively kept cool and the feet warm for proper fluid and energy movement in the body to take place. Just like the

ancient Chinese landscape painting where at the top there is ice-capped mountain and below where the river runs down is a warm valley all has a meaning. In the cold winters, good boots and thick pants most important. Winter is also a good time to get the Chi moving with light physical exercise such as walking, Qi gong, Tai chi, Yoga not the HOT king at all, get massages, lymphatic work, trampoline and keep it in the mellow side of the exercise routines to prevent stagnation. However, on stormy or windy days, it is important to retrieve your energy up properly or to stay indoors when possible. The cold that surrounds us at this time of year can easily seep into our bodies and lower our immunity not to mention the damage to are kidneys. Exercise until you are warm but stop before you sweat too much so you don't spend your heat reserve by it.

If you happen to have cold-damp tendencies, you can encourage your circulation and transformation with warming herbs such as ginger, cinnamon, cloves, cardamom, fennel and anise. These herbs and spices are extremely valuable and not only for taste and flavour but also for health and proper function of the body. This is most likely why the spice trade was so valuable to the Europeans and other civilizations for thousands of years

According to TCM, stress, frustration, and unresolved anger can work together to throw your immune system off so does fear and the Kidneys are the ones that are in charge of that emotion, when is imbalance in the kidneys it allows for pathogens to easily affect your body. Things that deplete our base energy are:

- Stress, fear, insecurity, and overwork
- Toxins in our food, water, and environment (e.g. pesticides and heavy metals), as well as intoxication

with drugs (alcohol is also consider a drug that turns into sugar)

- Consumption of too many sweet food (sugar) and Caffeine also
- Excessive semen loss for men (this means to much sex for man) and women bearing “too many” children (for their constitution), or not rebuilding adequately after each birth.

Aspirin and Vitamin C are both cold on the body and digestive system specifically, so in winter you may want to try an alternative to aspirin for pain and get your Vitamin C from food sources such as pumpkin soup or warm fruit compote, porridge ...

Winter warming Herbs and Spices

Adzuki beans – remove damp and ease swelling

Celery – calms the liver and treats high blood pressure

Chestnut – strengthens kidneys, lower back and knees

Kidney Beans – strengthens kidneys and helps with lower back pain and sexual problems

Leek – warms the body Liver – nourishes blood and treats Liver deficiency

Pine nuts – builds the yin of the heart and lungs

Root vegetables are great in general.

shares this information.

THE KIDNEYS

The Kidney: is the organ system that shares the power of Winter. Just as the bear survives upon accumulated reserves, the Kidney harbors our Essence that feeds and renews our life force. It is the Kidney that supports the reproductive organs governing sexuality, as well as engendering the structural

elements of the body that regulate growth, bones, teeth, hair and regeneration.

It also is directly connected with the reproductive system and fertility. A deficiency of this energy can mean a fetus may not be able to grow and develop correctly. TCM always encourage mothers-to-be to take tonics for their Kidney energy in order that their child has the best possible start to life and so that the mother will not be left depleted after the birth also.

Our base or Kidney energy determines our ability to grow and develop, physically and mentally.

This is dependent upon an adequate store of Essence, which gives rise to the marrow, which produces the brain, spinal cord, bones, teeth, blood, and hair, so as we see is of crucial importance to maintain optimum care of it. Whereas Kidney Yin controls the juicy Essence, Kidney Yang kindles metabolic process. All the other organs depend upon the Kidney for moistening and regeneration (Yin), and for animation and warmth (Yang).

Winter in TCM is the season related to the water element and the organs associated are the Kidneys and Bladder, both of which are very sensitive to cold. The Kidneys are considered to be the gate of life, storing our life essence, regulating reproduction and development, fluid distribution and our longevity, among other vital functions these are directly related to the health of our Kidneys. It seems impossible to be too good to the Kidneys in Chinese medicine and supporting them becomes increasingly important as we get further into our later years.

They store all of the reserve Qi in the body so that it can be used in times of stress and change the ability to cope with stress, or to heal, prevent illness, and age gracefully, may support our wellbeing. They are the balancer of heating and

cooling in the body. The image of the Kidney it resembles a pot on an open flame. The water represents the yin aspect and the fire represents the yang fire that steams the water up and through the body from the base energy of the Kidneys that powers the bodily functions.

In winter it is the time when many people tend to reduce their activity. Is that true for you?, It's wise to reduce the amount of food you eat to avoid gaining weight unnecessarily, due to the fact that the tendency here is to eat more carbohydrates and have fast fuel, is best to slow down all the way around.

The health of our Kidneys can be seen from the health of our hair and experienced through the sense of our hearing. Hair loss, premature graying, split-ends, hearing health, ringing in the ears (Tinnitus) all signal Kidneys that could do with a boost. Bone marrow is linked with the Kidneys as are problems with the knees, little bones, lower back and teeth. These are major parts of our health that is a great deal for so many people. Many ear problems can be linked to the Kidneys and the health of our Kidneys directly impacts on reproduction and sex drive, ouch not so good!.

It dictates our growth, by that we are saying size, tall or short and under developed when not working optimally.

Lets talk about the Kidney type individual;

Signs Of a healthy Kidneys

A youthful appearance at all ages

Thick hair healthy hair

The body frame that is sturdy

A dense physique

Strong healthy teeth

Strong healthy bones

A very sharp mind

Clear thinking

Absence of irrational fear

Absence of fluid retention and puffiness

A really strong spiritual connection

When the Kidney is unhealthy

Second guessing and self-doubt

Disconnection with internal wisdom which causes fear

The intellectual knowledge weakens

It is a clear sign of premature aging a lifeless withdrawn look

The appearance is usually pale and withered

And here is the answer for the dark circles under the eyes

Puffy

Hair loss thin hair especially when it starts early

Growth delay (small children that don't seem to match their age size)

Delay maturity

Bones that are brittle

Premature greying of the hair

Abundance of dental problems

Excess fluid retention

Hearing challenges like hearing lost

No drive to accomplish any goals

General Confusion

General Fear

Irritated for no reason

Daze and confused like Led Zeppelins's song said

Sleep and Rest More: In winter go to bed early and wake up late, read a great book and dose off. Nights are longer in winter, the sun sets early and rises late so it is easy to

feel like crawling in bed. Sounds great to sleep early and rise late, Therefore, one should refrain from overusing the yang energy which relates to go go go. Retire early and get up with the sunrise, which is later in winter. Some of this advice for winter focuses on humans' natural circadian rhythms, a biological process noted in almost all living organisms that displays a change over a 24 hour period.

From: https://en.wikipedia.org/wiki/Circadian_rhythm

Circadian rhythms allow organisms to anticipate and prepare for precise and regular environmental changes. It has therefore been suggested that circadian rhythms put organisms at a selective advantage in evolutionary terms. However, rhythmicity appears to be as important in regulating and coordinating *internal* metabolic processes, as in coordinating with the *environment*.

Outside the “master clock”

More-or-less independent circadian rhythms are found in many organs and cells in the body outside the suprachiasmatic nuclei (SCN), the “master clock”. These clocks, called peripheral oscillators, are found in the adrenal gland, so it is important to be conscious of stress levels and the amount of caffeine we consume, these factors contribute directly, to overworked adrenals and that keep us up and creates too much adrenalin and Cortisol (High cortisol contributes to WEIGHT gain), these are other parts of the body that circadian rhythms are found in [oesophagus](#), [lungs](#), [liver](#), [pancreas](#), [spleen](#), [thymus](#), and skin. Though oscillators in the skin respond to light’

So with that knowledge we must consider the blue light of the TV and mobile devices before we go to sleep especially after 10PM and even before that time a day because it alters the Circadian rhythms, which have control in production of Melatonin, and the glands that control AGING!!! so we have choice. It is best to sleep in a fully dark room.

Manage your stress: Stress weakens the immune system, full stop. It's our response to stressors that we call stress, just as much as the stressors themselves. Some of us make everything stressful. Winter is a time for introspection as well as celebration.

Eat well: Eat freshly cooked food with lots of vegetables. Freshly cooked food is just that; freshly cooked.

Protect Your Body from the Elements: Catching a chill weakens your resistance to the rhino-viruses that cause colds. So match your dress to the weather. We protect ourselves from the rain with rain gear. We also have to protect from the cold and wind with warm clothing. Especially keep your head, neck, upper back, and belly warm and safe from wind. Wear a hat and a jacket with a warm collar or a scarf. If you sweat with exercise, dry off as quickly as possible. If you do get a chill after being outdoors, drink **hot ginger or cinnamon tea** when you come in. Boil water, add 3 slices ginger root and simmer a minute. If not available get some masala chai at the cafe and there you will be getting the herbs and spices you need all in one place. Pay attention what is the base of your Chai some have too much caffeine.

CHAI INGREDIENTS

CHAI LATTE CONCENTRATE

CINNAMON
STICKS

DARJEELING
BLACK TEA

NUTMEG

PEPPERCORNS

CLOVES

VANILLA
BEANS

CARDAMOM

GINGER

MILK

ORANGE PEEL

STAR ANISE

AGAVE
NECTAR

FRONTIER
NATURAL PRODUCTS CO-OP

Exercise: is always healthy. However slow, repetitive movements with less exertion than usual must be preferred. Short walks and exercises to strengthen the lower part of the body (legs, hips, pelvis, low back) are the best choice. Physical exercises must always be balanced with energy work: guided energy meditations (internal alchemy), yoga that includes more than stretches. Qi Gong and Tai Qi Chuan are the ways to create that balance. It is advised to avoid sweating during the coldest months, as this is thought to cause injury to the kidney qi, or energy, an internal energy people should strive to preserve in winter. According to Huang Di, sweating will “cause weakness, shrinking of muscles, and coldness, and the body may lose its ability to open up and move in the spring.” It is important to conserve energy in winter so that it can be put into action in spring.

Recipes to sustain wellbeing in Winter

Healing Congee Recipes

From: <http://www.5eacupunctureclinic.com/emilys-blog/item/healing-rice-soup-congee-recipe>

Just a simple cup of rice makes a healing soup called

“congee.” Congee is a nutritional rice soup served warm and can be eaten at any time of the day to support or recover good health. It is easy to digest and is perfect when you are experiencing any discomfort digestively or [recovering from the flu](#), surgery, childbirth or food poisoning among other conditions.

Dr Emily Navas says: I tell my patients to use 1 cup of rice to 8 cups of bone broth or vegetable broth.

Cook in a covered saucepan on low heat and simmer for about 2-3 hours until the rice is completely broken down and is a creamy consistency. Stir occasionally to prevent sticking. Adding vegetables and herbs about an hour into cooking is the way to make this a healing soup.

Choose the following to be added depending on the purpose of the healing:

Ginger: to treat cold and deficiency, [diarrhea](#) and [indigestion](#)

Aduki beans: to treat edema and increase urination, diuretic; curative for edema and gout

Carrots: to ease intestinal gas symptoms

Fennel: to help treat cold and deficiency, harmonizes stomach, expels gas; cures hernia

Butternut squash: my favorite to help increase the qi and to add a sweetness to meals, great for children Congee.

Onion or leek: to warm the digestive system and treat chronic diarrhea, great tonic for lungs

Red dates: overall strengthening of the energy

Liver: to treat blood deficiency (I like to use organic chicken livers)

Cod fish or Dried mini-shrimp: for the deficiency and [fatigue](#)

and brain fog

Chestnut: Tonifies kidneys, strengthens knees and loin; useful in treating anal hemorrhages

Water Chestnut: Cooling to viscera; benefits digestive organs

Chicken or Mutton Broth: Recommended for wasting illnesses and injuries

Duck or Carp Broth: Reduces edema and swelling

Leek: Warming to viscera; good for chronic diarrhea

Mallow: Moistening for feverishness; aids digestion

Mung Bean: Cooling, especially for summer heat; reduces fevers; thirst relieving

Mustard: Expels phlegm; clears stomach congestion

Salted Onion: Diaphoretic; lubricating to muscles

Black Pepper: Expels gas; recommended for pain in bowels

Red Pepper: Prevents malaria and cold conditions

Pine Nut Kernel: Moistening to heart and lungs; harmonizes large intestine; useful in wind diseases and constipation

Poppy Seed: Relieves vomiting and benefits large intestine

Purslane: Detoxifies; recommended for rheumatism and swellings

Radish: Digestant; benefits the diaphragm

Pickled Radish (salt): Benefits digestion and blood

Brown Rice: Diuretic; thirst-quenching; nourishing; good for nursing mothers

Sweet Rice: Demulcent; used for diarrhea, vomiting, and indigestion

Scallion Bulb: Cures cold diarrhea in the aged

Sesame Seed: Moistening to intestines; treats rheumatism

Shepherd's Purse: Brightens the eyes and benefits the liver

Spinach: Harmonizing and moistening to viscera: sedative

Taro Root: Nutritious; aids the stomach; builds blood

Yogurt and Honey: Beneficial to heart and lungs

In acupuncture often recommended depending on their symptoms, the following herbs to add an hour into cooking:

Cordonopsis (Dang Shen) for tired limbs, fatigue and prolapse of any kind

Astragalus Root (Huang Qi) for post-partum fever due to blood and qi deficiency, also an amazing herb used in any recovery stage.

Licorice root (Gan Cao) for painful spasms of the abdomen or legs

Goji Berries for blood deficiency and calming effect

For those who are recovering from serious chronic illness, congees are a way to rebuild the health with a cereal of rice or grain combined with appropriate foods and tonic herbs. This type of therapeutic porridge is easy on the digestive system and is well assimilated for those who are weakened from chronic disease. Cook as you would rice or grain.

HEALING PROPERTIES OF CONGEE

This simple soup is easily digested and assimilated, it helps tone the blood and the qi energy, harmonizes the digestion, and is demulcent, cooling, and nourishing. Since all the chronically ill people often has weak blood and low energy, and easily develops inflammations and other heat symptoms from deficiency of yin fluids, the cooling demulcent and tonifying properties of congee are particularly beneficial; it is also useful for increasing a nursing mother's supply of milk. The liquid can be strained from the porridge to drink as a supplement for infants.

Other therapeutic properties may be added to the congee by cooking appropriate vegetables, grains, herbs, or meats in with the rice water it adds different qualities to it. Since rice itself strengthens the spleen-pancreas digestive center, other foods added to a rice congee become more completely

assimilated, and their properties are therefore enhanced. Listed above are some of the more common rice-based congees and their specific effects

Eminence Organics Biodynamic Facial Recovery Oil

Eminence Organics Biodynamic Herbal Recovery Oil (0.5oz) is a healing facial treatment with anti-aging benefits. It revitalizes tired skin, removes fine lines and wrinkles, and locks moisture in for long lasting dermatological health and a gorgeous complexion.

100% Pure French Lavender Body Scrub

Fragrant French Lavender body scrub instantly makes your skin soft, smooth, healthy, glowing and vibrant.

Eminence Organics Arctic Berry Peel & Peptide Illuminating System

The Arctic Berry Peel & Peptide Illuminating System is a three step dermatologic regimen that exfoliates, peels, and nourishes the skin to keep your complexion looking bright and gorgeous between spa visits. Spa-level, natural ingredients treat and stimulate the skin so it feels healthy and looks gorgeous.

PCA Skin pHaze 15+ C-Quench Antioxidant Serum

This cosmetically elegant 15 percent L-ascorbic acid serum is suitable for all skin types. The product is especially effective for normal to dry and mature skin types, as it contains ingredients that help the skin attract and hold

moisture. It provides a supportive feel to lax skin, smoothes fine lines, minimizes pores and plumps and strengthens the skin.

Key Ingredients

Ascorbic Acid (Vitamin C)

Sodium PCA

Squalane

Hyaluronic Acid

Glutathione

esveratrol
